

## Burning instructions

### 1. Hardware part

as the picture shows:

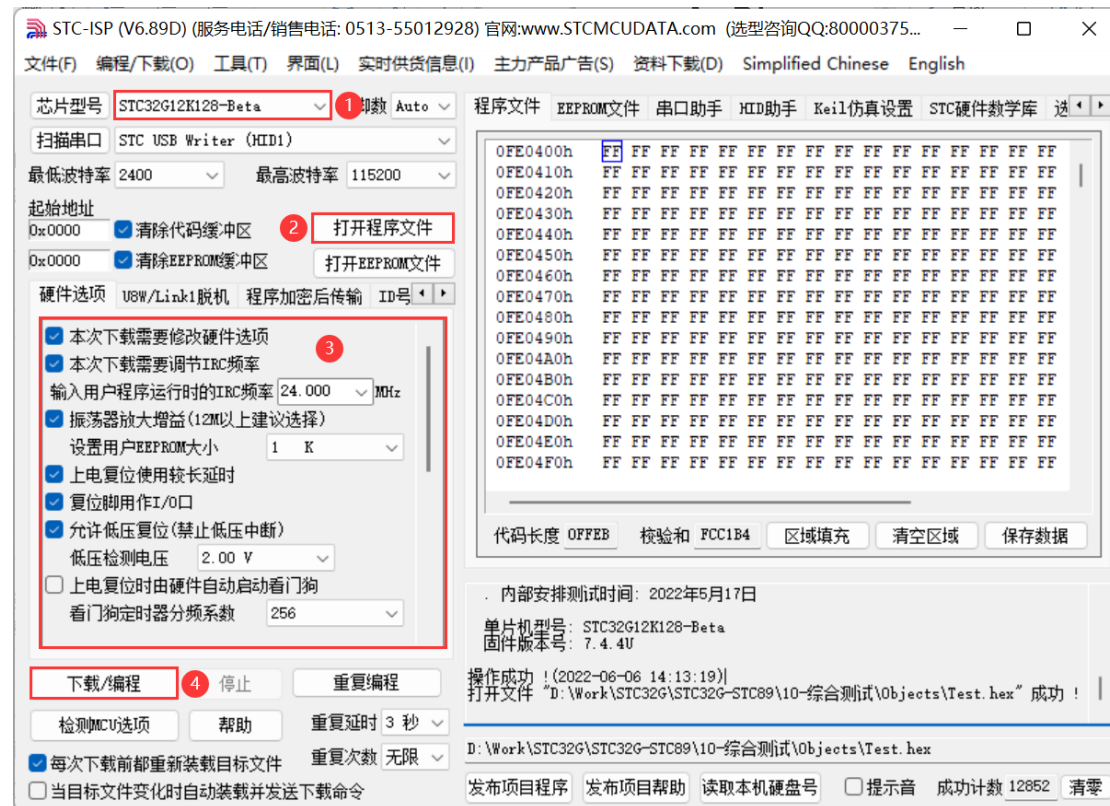

- 1) Use TYPE-C data to connect the core board to the computer;
- 2) Press and hold the P3.2 port button;
- 3) Press the power OFF button (press-release), and then release the P3.2 port button; under normal circumstances, the "STC USB Writer (HID1)" device can be recognized on the STC-ISP software:

## 2. Software part

as the picture shows:

1) Select the chip model;

2) Open the program file to be burned;

3) Set hardware options;

4) Then you can click the "Download/Program" button to start the download. After the download is

complete, the information box in the lower right corner will prompt "Operation successful".
